BIOBased CLEARLine® products

Embrace **Transparent**
Sustainability with
BIOBased CLEARLine®
products

Made of certified raw materials based on renewable feedstock

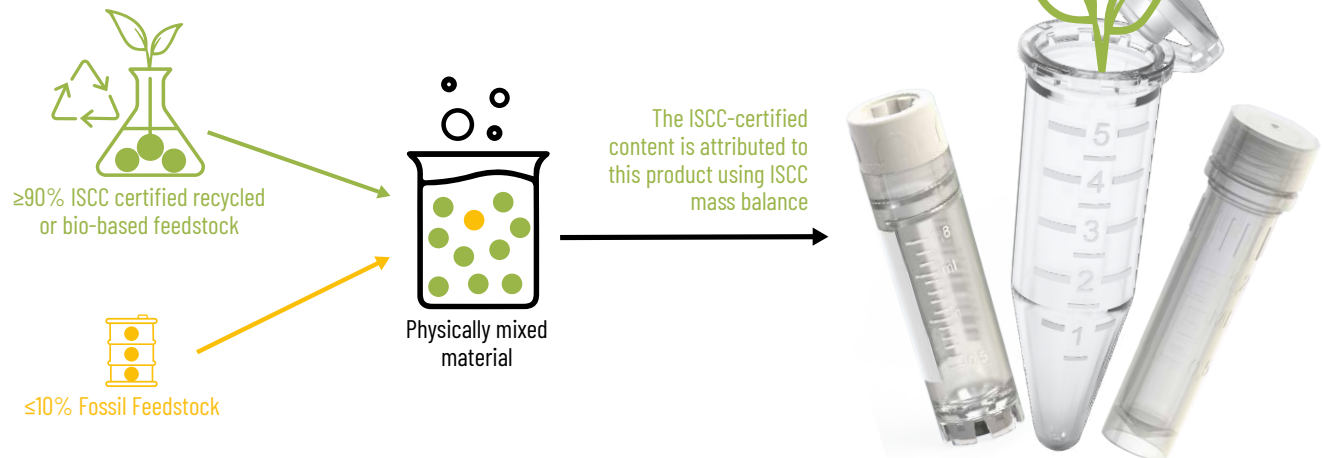

Third-party verified information environmental impact

BIOBased CLEARLine® products

Conventional plastics, especially those from non-renewable sources, pose a challenge to the environment due to their limited biodegradability. Laboratories can mitigate their impact by integrating bio-based materials and adopting environmentally-friendly practices that minimize their plastic footprint.

Biosigma, committed to innovation and sustainability, has embraced the Mass Balance Model, integrating circular feedstocks into its production facilities.

As a pioneer in innovation, Biosigma introduces the **BIOBased CLEARLine®** products, which are manufactured with at least 90% certified plastic from bio-based raw materials.

During this process, the properties of the polymer and the product remain compliant with the existing specifications. Such a sustainable approach not only preserves product integrity, but also contributes to significant emission savings, in line with our commitment to a greener future.

The commitment to sustainability is also evident in the choice of feedstocks, which are derived from renewable sources such as agricultural residues, food waste, and other organic by-products. These materials are not only environmentally friendly, but also have **ISCC Plus certification** as Bio and Bio-circular products. The sustainability criteria and the entire process are certified by the International Sustainability and Carbon Certification (ISCC) organization.

"ISCC - International Sustainability and Carbon Certification (ISCC) is an independent certification system that ensures compliance with high environmental and social sustainability requirements, the reduction of greenhouse gas emissions and traceability throughout the supply chain."

In addition, all **BIOBased CLEARLine®** products have the ACT Environmental Impact Factor Label awarded by an independent auditor and published by My Green Lab® <https://act.mygreenlab.org/>

The ACT (Accountability, Consistency, and Transparency) label provides clear, accurate, fair, and greenwash-free information on environmental impact in all areas, including manufacturing, energy and water use, packaging, and end-of-life.

BIOBased 1D CryoGen® Tubes CLEARLine®

CLEARLine®
"Be cool, be safe, be CLEARLine®"

- Tubes in Polypropylene - caps in Polypropylene and TPV, from medical grade raw materials
- Zip bags, re-closable
- Innovative screw caps eliminate leakage and contamination
- Standard code 128 barcode unique and unrepeatable
- Storage temperature Range: from +4°C to liquid nitrogen vapor phase
- Particularly suitable for cell culture, microbiology, and other long-term storage samples
- Sterile SAL 10⁶
- Certified IATA P1650
- Certified free of Human DNA, DNase, RNase, Endotoxins, ATP and PCR inhibitors

* Certificate of analysis and Certificate of validated Beta rays treatment are available for download on www.biosigma.com

BIOBased CLEARLock™ microtubes CLEARLine® 0.5, 1.5, 2 and 5 ml

CLEARLine®
"Be cool, be safe, be CLEARLine"

- In Polypropylene Medical Grade, Non-Cytotoxic - Non-Hemolytic
- Zip bags, re-closable
- Optimal transparency
- Graduated with writing area
- Hinged lid prevents any unintentional opening during use and avoid evaporation during long-term storage
- Pierceable writing cap
- Temperature range: -80°C + 100°C
- Centrifugation up to 30,000 x g
- Autoclavable at +121°C for 20 minutes
- Recommended for PCR and other molecular biology applications - chemical and biological sample storage
- Certified free of Human DNA, DNase, RNase, Endotoxins, ATP and PCR inhibitors

*Certificate of analysis available for download on www.biosigma.com

BIOBased Microtubes Screw Cap CLEARLine® 0.5, 1.5 and 2 ml

CLEARLine®
"Be cool, be safe, be CLEARLine"

- Tubes in Polypropylene - caps in polyethylene from medical grade raw materials
- Available in 3 caps styles and 6 sizes of conical bottom or self-standing tubes (0.5, 1.5 and 2ml)
- Centrifugation up to 25,000 x g
- Temperature range: -85°C + 121°C
- Autoclavable to 121°C for 20 minutes
- Recommended for several biotechnological applications
- Sterile SAL 10-6
- Certified free DNase, RNase, and Endotoxins

BIOBased CLEARLine® products

ensure...

- ✓ Certified Traceability of the Supply Chain
- ✓ Very limited dependence on non-renewable sources.
- ✓ Reduction of greenhouse gas emissions
- ✓ The Transition to a Green and Circular Economy
- ✓ Same Performance as fossil-derived materials without compromising on quality

✦ **A Conscious Step Towards a Sustainable Future**

Special product highlights

The Biosigma Production Centers in Cona/Italy and Ruzomberok/Slovakia are ISCC PLUS (International Sustainability & Carbon Certification) certified - ACT labelled (Accountability, Consistency, Transparency) - Environmental Impact Factor Certification conducted by My Green Lab® - Tubes* and Microtubes are made from at least 90 % renewable feedstock (recycled e.g. from food oil wastes and residues), applying ISCC mass balance approach.

Identification Feature

On the bag and on the cardboard box you find an informing additional label as follows:

These microtubes are made with 90% bio-based plastic. The plastic can be traced back to biological waste material which is attributed to these microtubes via the ISCC mass balance approach.

By choosing these consumables, our customers help to significantly reduce the amount of fossil resources required for their production.
